We have been designed, developed and now are supported such software as dental clinics network management system, online learning management system and a social platform for athletes. In Armenia the company implemented an online course management system for VTB Armenia bank and a customer relationship management system for Star supermarket chains.

TEACH FOR ARMENIA

http://www.teachforarmenia.org/english

Teach for Armenia is a NGO that mission is to improve educational outcomes for all children in Armenia by recruiting and training exceptional individuals to teach in regional underserved schools for a minimum of two years.

They improve educational opportunities for disadvantaged youth by investing in and developing Armenia's top talent to teach in high-need schools. Creating new educational opportunities for children also sets a new standard for educators. The educators, dynamic and young individuals, lead their students to academic and personal excellence by focusing on rigorous academic growth, values and mindset, and serve as a valuable resource in their school's community.
